

## LOADING DOCK - BILLERICA, MA

### PROJECT DESCRIPTION

A busy loading dock in Billerica, MA, was in need of repair. The slab-on-grade concrete was in horrendous shape and the saw cuts had eroded due to salt, snow, ice, plow trucks, and wear from all the tractor trailer traffic. **Owner John Roberto turned to Arisfor ToughDeck® due to its performance value and the quick turnaround time that they needed.** Due to the high traffic at the loading dock, the project could only be worked on at night and had to be completed in one weekend by Middlesex Contracting. Arisfor ToughDeck® was applied with a gauge rake and squeegee and was given a broom finish. The dock is now back in service and working well. **This was the first time the contractor used Arisfor® products on a large job, and in result, have now been referred to other management companies due to the owner's satisfaction.**

### KEY POINTS

- Quick Dry Time
- Provides Long-Term Durability
- Superior Finish

### DETAILS

**Date:** 2015

**Location:** Billerica, MA
