

APARTMENT FLOOR - GROVE CITY, PA

PROJECT DESCRIPTION

Aires Property Management located in Grove City, PA wanted to start using laminate flooring in the apartments they own, hoping it would last longer and they would not have to replace the carpet with each new tenant. The concrete was too uneven and not smooth enough to lay the floor. To fix this problem, ToughDeck FR was used to create a smoother and more level surface so they could apply the new floor on top. The total project size was 200 sq ft and required 3 bags of ToughDeck FR and 4.5 gal of Bond. The customer decided to use ToughDeck FR because of its **ease of use, durability, and longevity**. This **project was finished in less than two hours** and the laminate flooring was applied the next day. The **minimal prep work** and **fast dry time** is a huge benefit for property managers that have tenants and require **quick turn around times**.

KEY POINTS

- Quick Dry Time
- Superior Durability
- Ease of Use
