

GARAGE FLOOR - JOHNSTOWN, PA

PROJECT DESCRIPTION

This residential two car garage floor was pitting in areas up to 3/4" from the effects of rock salt being tracked in during the winter months. The homeowners chose to restore the garage floor using Arisfor ToughDeck® in "Sandstone". The contractor applied ToughDeck® with a trowel over the original garage floor. After the ToughDeck® was applied, the garage was back in use shortly after, allowing the home-owners to benefit from the extremely quick dry-time. **ToughDeck® will provide years of superior protection from the effects of the rock salt and other environmental and chemical variants that may come in contact with the garage floor.**

KEY POINTS

- Quick Dry Time
- Provides Long-Term Durability
- Superior Finish

DETAILS

Date: 2017
